

Instructions: Install git CLI in your laptop so that you can work on your projects.

Submit: Write a simple report explaining what you did. This will serve as a reminder of how you did it, settings, etc.

I navigated to github.com and typed github CLI into the search bar in the top left corner of the webpage. I was redirected to the repository that holds the CLI code. After reading through how to do the Windows installation, I opened a command prompt on my computer and went to C:\Windows\System32 (root) to install using the command:

```
winget install --id GitHub.cli
```

After agreeing to the terms of transaction the CLI was installed!

```
Microsoft Windows [Version 10.0.22621.2134]
(c) Microsoft Corporation. All rights reserved.

C:\Users\bbarr>cd C:\Windows\System32

C:\Windows\System32>winget install --id GitHub.cli
The 'msstore' source requires that you view the following agreements before using.
Terms of Transaction: https://aka.ms/microsoft-store-terms-of-transaction
The source requires the current machine's 2-letter geographic region to be sent to the backend service to function properly (ex. "US").

Do you agree to all the source agreements terms?
[Y] Yes [N] No: y
