W2T3 Visual Studio Code

Instructions: Install Visual Studio Code in your laptop. Please bring it to class.
Submit: Write a simple report explaining what you did. This will serve as a reminder of how you did it, settings, etc.

I navigated to code.visualstudio.com and found the link to install VS Code for Windows and clicked on it. The file was downloaded to my laptop and I opened it after it was done downloading. The files were installed to this path:

Destination location:

   C:\Users\bbarr\AppData\Local\Programs\Microsoft VS Code

Start Menu folder:

   Visual Studio Code

Additional tasks:

   Other:

     Register Code as an editor for supported file types

     Add to PATH (requires shell restart)
